

INTRODUCING ALIENVAULT™

Keeping up with the changing needs in CyberSecurity and compliance is hard work. That's why we don't go it alone. We partner with AlienVault. With AlienVault we can offer comprehensive CyberSecurity solutions for companies that are in compliant industries such as healthcare, financial, federal and many more with real time monitoring and a full suite of reporting to meet every compliance mandate.

ALIEN VAULT

HEALTHCARE

- HIPAA Compliance
- ePHI Log In Management
- Secure Scheduling Tool

FINANCIAL

- Cyber Threat Detection
- Threat Prioritization
- Integrated Threat Intelligence

SECURITY CAPABILITIES

- SIEM Event Correlation
- Incident Response
- Log Collection
- Netflow Analysis
- Service Availability Monitoring
- Network, Host and Wireless IDS
- File Integrity Monitoring
- Active Network Scanning
- Passive Network Scanning
- Asset Inventory
- Host-based Software Inventory
- Continuous Vulnerability Monitoring
- Authenticated/Unauthenticated Active Scanning

ALIENVAULT™ SOLUTIONS

A unified, simple and affordable solution for advanced threat detection, incident response and compliance management. AlienVault™ Unified Security Management (USM) delivers all of the essential security controls required for complete security visibility – asset discovery, vulnerability assessment, intrusion detection, behavioral monitoring and integrated threat intelligence. The easy to consume threat intelligence allows organizations to detect the latest threats and prioritize response efforts.

- **Security Intelligence** – Correlate and analyze security event data from across your network
- **Behavioral Monitoring** – Identify suspicious behavior and potentially compromised systems
- **Threat Detection** – Detect malicious traffic on your network
- **Asset Discovery** – Find all assets on your network before a bad actor does
- **Vulnerability Assessment** – Identify systems on your network that are vulnerable to exploits

SPECIAL FEATURES

- **Real-time Botnet Detection** – Identifies infection and misuse of corporate assets
- **Data Exfiltration Detection** – Prevents leakage of sensitive and proprietary data
- **Command-and-controls or traffic (C&C) Identification** – Identifies compromised systems communicating with malicious actors
- **IP, URL, and Domain Reputation Data** – Prioritizes response efforts by identifying known bad actors and infected sites
- **Advanced Persistent Threat (APT) Detection** – Detects targeted attacks often missed by other defenses
- **Dynamic Incident Response and Investigation Guidance** – Provides customized instructions on how to respond and investigate each alert

**THE MOST
COMPREHENSIVE
UNIFIED
SECURITY
MANAGEMENT
SYSTEM
ON THE MARKET**

OPEN THREAT EXCHANGE (OTX)

- Direct integration with USM
- Export data to third party security tools
- Access to threat intelligence community
